

plantyboi

The place for good plant parents.

This is the plant tracking place! Keeping your plants alive and turning your black thumb into a green one isn't a feat you should have to do alone.

The best way to start is to take a look-see at your plant, open up plantyboi, and start tracking.

What's here?

- Plantyquiz,
- Plantyboi tracker,

- Plantybois,
- Plantyprints,
- Plantyboi herself

We'll go through everything it takes to keep your plant happy by tracking where it's at now and later.

Plantyboi was started by Breamons and the dozens of plant friends that she's keeping alive & thriving.

Contact me either by sending a bunch of plants my way or by sending me an [email](#).
